

Jeffrey Ross, Glenoe Associates LLC

I spent most of my career as a retailer. I owned 31 drug stores which I sold to CVS in 1992. In 1993 I bought a failing late stage start up in the pet supply super store space. Turned it around and built it into the largest privately held chain in New England then sold it to Petco Animal Supply in 1995. From there I took an equity position in a start up in the assisted living space. I commuted to Houston, TX for seven months. 150,000 actual miles was enough for me and came home.

I have owned and/or operated several other businesses: hotel, physician supply distribution and medical implement business; sold them all.

Since that time I have been making active investments in different companies manufacturing, retail etc. Additionally, I have been consulting to small, privately held business helping and advising in strategy, creating management teams and building the business for ultimate sale. This is my 7th CAP project. I have been involved in non-profits: 10 years on the board of Thayer Academy and a board member of Combined Jewish Philanthropies, etc.

I graduated Mass College of Pharmacy in 1968. I attended HBS OPM 5, completing the course in 1981.
